Professional Summary

Business Analyst and IT Project Lead specializing in ERP systems, workflow automation, integrations, SQL validation, API testing, UAT, documentation, and operational systems. Converts ambiguous business problems into structured requirements, process flows, data mappings, UAT plans, rollout documentation, and adoption-ready ERP workflows.

Core Skills

Business Analysis: BRD, FRD, stakeholder discovery, requirement gathering, gap analysis, user stories, acceptance criteria, process mapping, SOPs, and rollout planning.

Systems & Integrations: ERPNext, Frappe, Shopify, Shiprocket, REST APIs, Postman, payment workflows, GST e-invoicing, role permissions, approval flows, and master data.

Data & Delivery: SQL, Excel, data validation, reconciliation, field mapping, dashboards, UAT, defect tracking, production support, issue triage, and sign-off documentation.

Selected Project Experience

ERP Workflow Automation

Documented current-state operations, designed future-state ERP workflows, and defined fields, validations, roles, approval flows, UAT scenarios, and rollout documentation.

Shopify to ERP and Logistics Integrations

Created source-target mappings, sync rules, validation scenarios, exception handling notes, and API test cases for e-commerce, inventory, shipment, and operational workflows.

GST E-invoicing and Finance Workflow Support

Captured requirements, defined business rules, supported SQL validation and UAT, and documented exception scenarios for finance process readiness.

Career & Education

Business Analyst & IT Project Lead: ERP and integration workstreams, discovery, UAT, rollout support, documentation, and coordination with IT and business teams.

Process Engineer Intern to Full-time: shop-floor, warehouse, production, quality, inventory workflow mapping, bottleneck analysis, and process improvement opportunities.

BE, Sri Venkateswara College of Engineering - CGPA 7.77

Business Analysis & Process Management - Coursera, 2025
